

## Technical Visit Volvo Cars production plant, Torslanda + Volvo Museum

Thursday August 27<sup>th</sup>, 2020. Departure with Bus from Göteborg 9.00 AM, return time 3 PM.

Success and expansion in the latter 1950s led management to begin planning for the Torslanda Plant in 1959 in a rural area that had been intended by city planners as a future industrial use. The plant was inaugurated on 24 April 1964. Originally employing about 2500 people the plant became Sweden's largest workplace. Currently, a workforce of about 5000 can produce the current capacity of 170,000 cars.

The visit will start with a tour in the Torslanda production plant, and then end in the Volvo Museum.
